

Kingsville Condominium

The project included the new construction of a six-storey, 56,000 sqft multi-residential condominium, complete with 39 suites on less than an acre of land. The buildings superstructure is comprised of a poured concrete foundation, light-gauge steel frame and COMSLAB flooring system.

Load-bearing wall panels prebuilt offsite and erected upon the 11,000 sqft floorplate by A-LINX.

Sector: Multi-Residential

Corporate Associate Involvement: Site Civil, Municipal Servicing and Concrete Foundations

A-LINX Involvement: Supply & Installation of Interior and Exterior Load-Bearing walls, COMSLAB Flooring System and Structural Roof Assembly

Size: 56,000 sqft

Construction Complete: Fall 2019
